The full name of all co-authors, the presenter should be emphasized:

Dr. Paulo Avles and **Dr. Michael Braida**

Co-authors' work places: MedAire

Abstract title: Managing In-flight Medical Emergencies

Relevance

3.1. In-flight medical emergencies. Strategies and procedures of medical assistance for passengers.

Goal

To understand the most common in-flight medical events and causes for diversion AND react to these events as they arise.

Materials and methods

Based on MedAire's MedLink 30+ years of in-flight medical event data

Scenario based examples of how to plan for AND react to these events as they arise

Results

After attending this session the audience will be able to re-affirm their organization has the necessary tools to mitigate these risks, or have the knowledge to put appropriate measures in place.
